

BRUMBY RESOURCES

ASX Release

9 June 2010

DRILLING COMMENCED AT GOLDSWORTHY DSO- MAGNETITE PROJECT - WA

Brumby Resources Limited (**ASX: BMY**) is pleased to announce a diamond drilling programme has commenced at the Company's Goldsworthy iron ore project, W.A.

The Project area is located approximately 70 kilometres east of Port Hedland, W.A. Refer to Figure 1.

A four hole diamond drilling programme comprising approximately 1600 meters will test previously defined offset gravity anomalies associated with the Western and Eastern ground magnetic-ground gravity anomalies.

It is interpreted that these untested offset gravity anomalies may represent blind DSO (Direct Shipping Ore) ore positions.

Refer to Figure 2 which shows the modelled 3D gravity anomaly in relationship to the four planned new holes and positions of previous drilling.

The Brumby Goldsworthy iron ore project is located within granted Exploration Licence 45/2539 encompassing an area of 112 square kilometres.

The project is locally situated 12 kilometres south west of the Atlas Iron Ridley magnetite deposit (2Bnt) and the Pardoo DSO open pit mining operation.

The two project areas are serviced by existing infrastructure including port, railway, sealed highway, electricity and gas pipeline.

About Brumby

Brumby Resources Limited is a diversified Perth-based exploration and resources company with a focus on iron ore and manganese exploration. Brumby listed on the Australian Securities Exchange (ASX) in 2006 and has made significant progress with projects in commodities including iron ore, manganese, base metals and gold.

The Company has assembled extensive and high quality ground holdings in Western Australia and the Northern Territory. Brumby's strategic approach is to refine targets, explore and evaluate the Company's projects in a cost effective and timely manner, and to identify and develop new mineral deposits with the potential to significantly enhance shareholder value.

Brumby is managed by a highly experienced team of mining individuals with expertise in mineral exploration, development, financing and operations.
